

The **Gamme S** is a line design to suit the needs of the performed racing or cruising riggings. This line is results from the Sparcraft know-how and expertise known in the sailing throughout the world for over 50 years.

MAST HEADS

- Different mast head configurations available :
 - Mast head rig
 - Mast Rig with taper
 - Fractional rig
 - Fractional rig with taper
 - Different options : single or double external spi attachments

SPREADERS

- The type of spreader tip depends on the configuration of the rigging (continuous or discontinuous). Complete, or parts :
 - discontinuous or continuous tips;
 - Alloy through bars;
 - Spreader backing plates,...

SECTIONS & HARDWARE

- The S range sections are designed to be suitable for cruising and race yachts for up to 75' (multihulls) and 80' (monohulls), and adapted for many different rig set-ups (mast head or fractional rig).

MAST SECTIONS S

Performance

OPTIMISATION

- We take the best mast section and the functionalities of each part to meet your specifications. The S range thus takes into account the particularity of performing rigging : weight to inertia ratio, geometry or aerodynamics...

HIGH QUALITY MANUFACTURING

Photo : SAPA GROUP

Sparcraft brings the utmost care to the rigs, from sections extrusion to the delivery :

- European high quality alloys and a large requirement in the choice of materials
- Quality control of the extrusions (twist & straightness)
- Anodizing after machining and drilling
- 5-axis machining (up to 22 meters)

SPARCRAFT
